

# This Period Activities

## Planned

Activity	Result	Status
Frequent mowing of greens, tees, fairways and rough	Due to the milder conditions, we have been cutting a lot more than usual at this time of year, taking up a lot of man hours that would normally be spent on other items like divoting of fairways	On-going
Sorting out levels of sand in bunkers	To make better playability	Always on-going
Cutting back of the long rough	To thin the grass sward out and avoid slow play from golfers looking for their ball, in a usual year this would have been finished.	On-going
Set mole traps	Less damage of mole hills	On-going
Divoting fairways when time allows	Aid recovery of fairways	On-going

# This Period Activities

## Planned

Activity	Result	Status
Screening of soil around sheds, cleaning up area and creating new compound by Alan Whiteford Plant Hire	We have now roughly 2,500 tons of good soil we can use for course improvements, if sold the value of it is roughly worth £25,000 plus transport and we paid £15,000.	Completed
Site visit of Health and Safety advisor	Awaiting report overall, a few obvious things picked up that we were aware of but nothing too drastic.	Action to be taken once report is received
Had course walk with Graeme Webster focusing on the 10 <sup>th</sup> , 12 <sup>th</sup> , 13 <sup>th</sup> and 16 <sup>th</sup> holes	He understands the need to focus firstly on our key feature holes and went through with him the desire to gain as much yardage as possible to get the course up to 6,000 plus yards.	GW will draught up some rough plans through alterations on top of google maps on 10, 12, 13 and 16 for us FOC at this time
Clearing/blowing leaves	To keep course clean.	On-going

# Next Period Tasks

Improving, extending and altering pathways.

Extending and clearing out old ditch route at the 14<sup>th</sup>.

Start up of tidying up trees to the left of the 1<sup>st</sup> tee, new pathway and practice nets, \*on approval from Dava wood residents\*

Moving of 7<sup>th</sup> winter tee mat to new location that was shown at the course walk.

Investigate further the former Polinar Dam pipework and underground water storage.

Monitor mole activity.

Slitting greens.

Verti Drain fairways.

Divoting of fairways.
